

Euro27®

The expanded comprehensive EU trademark search with overall legal opinion

Before you register or use a new mark, you want the most complete picture possible of potential conflicting marks, and an assurance that experienced professionals have conducted the most comprehensive search and thoughtful analysis possible. We think you'll find Avantiq's newest product, the Euro27®, provides just the quality Comprehensive search you're looking for. It covers all 27 European Union countries, and comes with an overall legal opinion by an experienced EU trademark attorney. Other searches are available, please see reverse.

Selected benefits

- Comprehensive search conducted in 27 EU countries, including CTM and WIPO.
- An overall legal opinion is provided by a carefully selected European attorney experienced in EU trademark law.
- Each search undergoes extensive custom search variations developed by our multi-lingual search experts, followed by an automated similarity search. In addition, we also search translations, transliterations and connotations.
- Every single trademark document is reviewed and analyzed by a senior searcher, who then organizes the final report by identical, very similar and similar marks—according to the specific criteria established by each client.
- Additionally, we take into careful consideration the competitor's marks, as well as how the client's own marks are handled.
- Each search is cross-checked for consistency, where results are compared country by country and reassessed for duplication, omissions, et cetera.
- Reports can be crafted in any order the client specifies — for example, country by country, or in order of relevancy across all countries searched.
- Reports can be delivered traditionally or reviewed, analyzed and printed immediately online via INSPIRO®.
